

The Department provides an excellent learning environment through its well-designed classrooms. All classrooms are spacious and properly ventilated, ensuring comfort and a healthy atmosphere for students and faculty. The seating arrangements are thoughtfully planned to allow clear visibility and interaction, supporting both traditional and modern teaching practices.

To integrate technology with teaching, the classrooms are equipped with projectors and audio-visual facilities. This enables

faculty members to adopt interactive methods, display presentations, demonstrate concepts, and engage students effectively. The smart use of digital tools makes learning more impactful and keeps students connected with the latest trends in technology-based education.

Ventilation and natural lighting are given special attention, providing a conducive setting for long hours of academic activity. The airy and well-lit environment helps maintain student attentiveness and enhances the overall classroom experience. Alongside this, the classrooms are maintained to high standards of cleanliness and order, reflecting the department's commitment to offering the best infrastructure for its learners.

The combination of spacious seating, good ventilation, and digital teaching aids ensures that the classrooms are not just physical spaces but true learning hubs. These facilities support lectures, seminars, group discussions, and interactive sessions, thereby catering to diverse teaching and learning styles.

With these provisions, the Department ensures that its classrooms contribute positively to the academic growth and holistic development of students, creating an environment that is both comfortable and technologically advanced
