

CONVERGE

VISIT . EXPLORE . GROW

OCT 7 8 9

Three days of hands-on technical workshops, engineering hackathons, and live pro evening performances hosted by 21 student societies on the MITS campus.

About MITS CONVERGE

[CLICK HERE TO REGISTER](#)

MITS Converge is a premier three-day campus event where technology, art, culture, media, and innovation intersect. For the first time in our history, 21 distinct clubs have joined forces to curate a unified, campus-wide experience under a single banner.

Converge is designed around distinct tracks, allowing you to build a customized journey that fits your interests. Whether you want to dive into technical challenges, explore creative design spaces, compete, or simply enjoy the cultural entertainment, you have the freedom to choose your own path. Find your track, connect with the community, and experience the ultimate collaboration at MITS.

CYCLOPS

WHERE CRAFTSMANSHIP MEETS THE THRILL OF MOTORSPORT

Day 1 – Selection Round: Every participating team is given a basic part to dismantle and reassemble in an allotted time slot. Mentors observe teamwork and coordination and record the time taken. After the task, each team prepares a process sheet documenting the steps they followed.

Day 2 – Engine Assembly Finals: Based on Day 1 performance, the top 5 teams are shortlisted to compete in the engine assembly challenge.

2-Day Workshop • Spans Day 1 & Day 2

Git In Action

WHERE CODE MEETS COLLABORATION

New to version control? This hands-on, beginner-friendly session will get you comfortable with the tools that power collaborative software development.

“Git In Action” aims to introduce first-year students to version control using Git and GitHub and build up from here — no prior experience required, just bring a laptop and curiosity.

Bridge It

BUILD, BALANCE, AND TEST YOUR BRIDGE.

A hands-on, time-bound team competition where participants design and construct a self-supporting bridge using a limited set of materials. Teams must plan their structure carefully, balancing strength, stability, creativity, and efficient use of resources. Once the construction period ends, each bridge is inspected and load-tested to determine how much weight it can safely support. Teams are evaluated based on load-bearing performance, creativity and innovation, and the overall aesthetics and neatness of their bridge. The event challenges participants to apply engineering concepts, problem-solving, teamwork, and creative thinking within a fixed time and material constraints.

Leadership Arena

STEP FORWARD, SPEAK UP, AND DISCOVER YOUR LEADERSHIP POTENTIAL

A one-day leadership experience that begins with an interactive leadership session focused on communication, teamwork, leadership qualities, and personal development, followed by a high-energy Leadership Arena competition. Participants work in teams of 4–5 through a series of challenges involving communication and trust, creativity and delegation, negotiation and collaboration, and decision-making under pressure. The event combines learning with hands-on challenges, giving participants the opportunity to put leadership skills into action, work together, and lead through real-time situations.

Brandathon

TURN CREATIVE IDEAS INTO BRANDS THAT STAND OUT

Built like a startup. Judged like one too.

Every brand starts with an idea, a product, and a challenge. That's where we begin.

Learn from industry experts about branding, marketing, and startups. Then, take a real product and reimagine its brand — new identity, new positioning, new story.

Pitch your vision to industry professionals and let your creativity speak.

Win the ₹5,000 cash prize, earn an exclusive KSUM visit and ecosystem access, and if your idea truly stands out, get a chance to work with the company behind the product you rebranded.

Oct 7 · 2 PM – 6 PM · Excel Hall

Seats are limited. Earn yours.

Build the Internet

LEARN HOW THE WEB WORKS AND BUILD YOUR PLACE IN IT

ACM  BUILD THE INTERNET

A 4-hour hands-on technical challenge where teams of 4 go beyond using the internet to build and connect their own mini internet system.

Explore DNS, Linux, IP addresses, ports, TCP/UDP, web development, and backend technologies while solving real technical challenges as a team. You don't need to know everything beforehand—problem-solving, teamwork, and adaptability matter most.

 Prerequisite: Install a Linux virtual machine (VM) on your laptop before the event and make sure it is working and ready to use.

Build. Connect. Troubleshoot. Stand out. Gain hands-on technical experience that you can showcase on your CV and portfolio.
