TRAINING AND PLACEMENT CELL-CGPU

The Training & Placement Cell in the institute plays a pivotal role in counseling and guiding the students for their successful career placement which is a crucial interface between the stages of completion of academic program of the students and their entry into suitable employment. The key focus of the Career Guidance and Placement Unit (CGPU) is to prepare students for their placements/internships and to motivate them for successful performance in exams like GATE, CAT etc. At MITS students are expected to excel not in technical knowledge but also in leadership, interpersonal skills and other attributes.

The focus is not only on soft/social skills but the entire process is now streamlined to a multifaceted and structured curriculum. The potential skill set requirements are identified during early stages of the course and starting from second year we have a module at par with industry standards to ensure that they evolve to be future ready. Training is a continuous process and not limited to external interventions alone with having a dedicated internal team to coordinate. Also aptitude and problem solving skills are given equal weightage and a structure is defined to ensure that the students attending the campus schedule in the final year will be acquainted with the process.

The CGPU of the college intend to scale up the activities related with training and placements with a much broader framework than just limiting its activities to the normal mode of providing recruitment opportunities alone. In the long run, the unit intends to handhold the students with a holistic approach on career and life rather than just functioning as a placement support system which complements the education objectives of respective departments.

The Career Guidance and Placement Unit (CGPU) of the institute play a very important and key role in counseling and guiding the students of MITS for ensuring them good campus placement and for opening avenues for higher studies. It is executed through these following functions and responsibilities:

Helps every student define career interest through individual counselling and in developing a personal profile for each candidate relating to the area of interest.

▶ To create an updated database and job profile of the companies and thus helps each student analyses and opts for opportunities pertaining to their interest.

▶ Organize and coordinates campus recruitment to ful fill its commitment of a job to every candidate.

▶ To connect with various industries and companies across the globe for better opportunities for students.

▶ Structured corporate liaison process connecting major cities and industries to ensure that we widen the recruitment portfolio year on year.

INDIVIDUAL DEVELOPMENT PLAN (IDP)

Individual Development Plan (IDP) is a MITS initiative executed through departments with the help of placement cell to guide and handhold students at an early stage (2nd year & third year) to create awareness about different career path and strengths required to accomplish best placements. Two faculty mentors are assigned to 15 students. Their role is to mentor and help them shape their IDP and improve their skills. The three immediate focus area of IDP to empower students for campus placements are,

1. Sharpening their aptitude skills
   ▶ Curriculum embedded training planned for S3/S4/S5/S6 (2 hrs per week – full semester)
   ▶ Mock test review/Follow up in IDP sessions (2-3 tests per month)

2. Enhancing coding/programming skills
   ▶ Curriculum embedded training (1 hr per week full semester)
   ▶ Handhold and Participate in Hackathons/Contest based hiring InfyTQ/CodeVita,
   ▶ Hacker Rank/Hacker Earth/spreading awareness/usage/practice review/follow up

3. English language proficiency both written/oral.

MoU with various major companies have been signed to have strong industry-institute interaction.
